

Today we will learn :

1. What are JMeter Templates
  2. How to use Templates
  3. How to create your own Template
- 

## 1 What are JMeter Templates

Reusable project scripts

User can select any template and it will generate a Test Plan with basic and necessary components

---

## 2 How to use Templates

File - Templates - select a template and start building over it.

---

## 3 How to create your own Template

Step 1 : save your test plan as .jmx file

Step 2 : place the .jmx inside jmeter/bin/templates

Step 3 : edit templates.xml file to add your template

Step 4 : restart JMeter and check

---

templates.xml

template

isTestPlan="true" : template will create a new test plan

isTestPlan="false" : templat will be merged into existing test plan

name : Name of the template

fileName : location of .jmx file

description : description will be displayed in html
